

Epoxy Compound

DENACOL EX-731

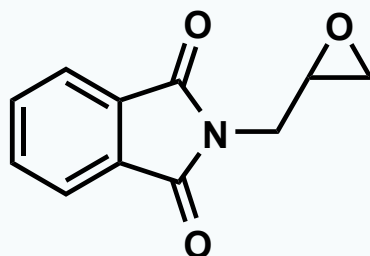

Product feature

- Mono-Functional type
- Thermostability
- Chemical resistant

Application

- Structural material
- Adhesion modifier

Chemical structure /name

N-Glycidyl Phthalate

General Properties

Epoxy equivalent (g/eq.)	Viscosity (mPa·s)	Bulk density (g/cm ³)	Appearance
216	(mp.95°C)	0.5	White powder

Each property and data introduced in this catalog, it is a representative value, NOT a guaranteed value. Also, please note that the specifications of the products are subject to change without notice.

Please read the Safety Data Sheet(SDS) before use.
