

Epoxy Compound

DENACOL EX-850

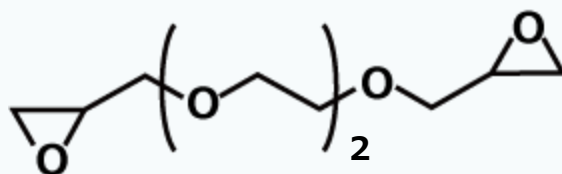

Product feature

- Di-Functional Aliphatic type
- Water solubility
- Low viscosity & chlorine content
- Flexibility

Application

- Crosslinker for waterborne resin
- Hydrophilizing agent
- Flexibility-imparting agent

Chemical structure /name

Polyethylene Glycol Diglycidyl Ether

General Properties

Epoxy equivalent (g/eq.)	Viscosity (mPa·s)	Total chlorine content (%)	Color value (APHA)	Water solubility (%)
122	20	0.5	30	100

Each property and data introduced in this catalog, it is a representative value, NOT a guaranteed value. Also, please note that the specifications of the products are subject to change without notice.

Please read the Safety Data Sheet(SDS) before use.
