

SUPER FRESH (Keep freshness)

What is SUPER FRESH?

A freshness-preserving packaging material (patented) coated with natural polyphenols + trehalose + and platinum on the inner surface of the OPP film.

- ◎ **Effect 1 Polyphenols** → The proanthocyanin component extracted from grape seeds has an antioxidant effect that suppresses the oxidation of food.
- ◎ **Effect 2 Trehalose** → TREHA® from Hayashibara Co., Ltd. is used, and it has a water retention effect and a freshness (life extension) effect that keeps the freshness of the food. (It is also used as a life-prolonging agent for cut flowers.)
- ◎ **Effect 3 Platinum** → It has antibacterial and antifungal effects.

How To KEEP FRESHNESS?
