

LNPTM ELCRESTM CRX COPOLYMER RESINS

SABIC'S SPECIALTIES BUSINESS

LNPTM ELCRESTM CRX COPOLYMER RESINS

IMPROVED CHEMICAL RESISTANCE MATERIALS FOR MEDICAL ENCLOSURES AND HOUSINGS

With patient safety at the forefront, the healthcare industry is mobilizing to address the concerns of increasing patient infections associated with medical care, known as hospital-acquired infections (HAIs). To help meet this challenge, medical equipment and high touch surfaces in patient care settings are repeatedly wiped down with increasingly aggressive chemical disinfectants.

NEED FOR IMPROVED CHEMICAL RESISTANCE

Manufacturers of medical equipment for patient monitoring, imaging, diagnostic, fluid and medication delivery need materials that offer improved chemical resistance to the more aggressive disinfectants used today in healthcare settings.

CHEMICAL RESISTANCE DATA - ENVIRONMENTAL STRESS CRACKING (ESC) PERFORMANCE

Compared to traditional PC, ABS, PBT and co-polyester resins and blends — which are potentially incompatible with highly aggressive disinfectants such as quaternary ammonium compounds — the new LNP ELCRES CRX resins can help prevent stress cracking and mitigate crack propagation.

NEW SOLUTION OFFERING

SABIC's LNP ELCRES CRX resins leverage unique copolymer technology to provide improved chemical resistance for healthcare devices and equipment, compared to existing materials used such as PC/ABS, PC/PBT, or co-polyester resins and blends.

PLASTICS DETERMINATION OF RESISTANCE TO ENVIRONMENTAL STRESS CRACKING (ESC) METHOD

SABIC'S ESC method evaluates retention of tensile properties vs. control for up to 7 days.

Compatibility Tensile criteria stress at color rating yield retention

Tensile stress at yield retention at (%) (%)

Compatible	> 90	80 – 139
Marginal	80 – 89	65 – 79
Not compatible	< 79	< 64 or > 140

This information should be viewed as a screening test. End users are responsible for determining the suitability of these products for their application requirements.

PERFORMANCE PROPERTIES

LNP ELCRES CRX copolymer resins are a new family of polycarbonate copolymers that can provide improved chemical resistance. These resins are based on unique copolymer building block blends offering a combination of:

IMPROVED CHEMICAL RESISTANCE

Improved chemical resistance to a range of chemical disinfectants

IMPACT RETENTION

Retention of ductility upon exposure to chemicals

PROCESSABILITY

Potential for high productivity molding and cycle time reduction

FLAME RETARDANCY

V0 rating up to 1.5 mm thickness

AESTHETICS

Consistent opaque color and appearance

POTENTIAL APPLICATIONS - MEDICAL EQUIPMENT HOUSINGS AND ENCLOSURES

Insulin pump

Infusion pump

Dental chair components

Ultrasound monitor

Hospital bed components

Surgical tools

Imaging devices
